

Do you want to join an exciting venture that is shaping the future of autonomous driving? Use your expertise and know-how for solving innovative challenges in autonomous driving and driver assistance within a highly motivated team of experts.

As an **Automotive Quality Manager** on the emotion3D team, you will define and maintain the quality management system, its relevant activities and processes as well as ensure that it is adhered to our customer requirements. As part of your day to day job, you spot and indicate gaps between department/team processes and company committed standards, indicate gaps between department/team processes and actual audit results and lead and support external assessments/audits of company committed standards. Join our team in Vienna as:

## Automotive Quality Manager (m/f/d)

Full time

### Your responsibilities:

- Assure the organization complies with applicable standards (ASPICE, ISO26262) and regulations and has the required certificates
- Lead and manage all the aspects of quality within the organization including a close relationship with internal and external stakeholders (subcontractors, suppliers, customers)
- Ensure appropriate quality plans are made and executed during all stages of the life cycle of the product
- Support projects and product lines and interacting with all R&D groups
- Work closely with R&D to improve documentation, development processes, and procedures to comply with various standards
- Create, review, and approve policies, procedures, work instructions, protocols, and reports to assure compliance with standards
- Conduct internal audits to different teams within the organization and perform gap analysis with a plan for corrective actions
- Conduct external audits for suppliers and subcontractors
- Define quality goals with various teams and departments

### Your skills:

- Proven experience as Quality Manager in the automotive industry
- Strong background with standards such as ASPICE, ISO26262
- Goal-driven and analytical, structured and independent approach to work
- Experience in leading team members and working with R&D teams
- Experience working in a regulated industry (automotive, aerospace, medical), aligning work methodology to requirements of that industry
- Experience in software development - big advantage
- Experience in information security and cybersecurity standards a plus
- EU-citizenship or work permit for Austria

### Your qualifications:

- BS, MS or Phd in Computer Science or related field
- At least 2 years' experience with executing audits on mass production manufacturers

### Our offer:

- An active role in a young and motivated team
- Flexible working hours
- A modern office environment in a central location in Vienna
- Regular team activities and healthy snacks
- A competitive salary fitting your expertise and qualification (minimum salary €42.000)
