

Do you want to join an exciting venture that is shaping the **future of mobility**? Use your expertise and know-how for solving innovative challenges in **autonomous driving and driver assistance** within a highly motivated team of experts.

As an **Automotive Requirement Engineer**, you will work on multiple interesting projects and be responsible for the design, planning, and execution of the area of requirements engineering as well as participation in functional analysis and architecture including all system functions, functional interfaces, and system boundaries in close cooperation with other team members

Automotive Requirement Engineer (m/f/d)

Full time

Your responsibilities:

- Manage the requirements on engineering projects, ensuring they are fully documented and traceable in line with the requirements management plan.
- Capture all stakeholder requirements.
- Validate requirements with respect to stakeholder requirements - both internal and external.
- Review Requirements with subject matter experts
- Provide status reports for requirements capture, validation and verification.
- Create and maintain project specification documents for internal and customer approval.
- Support the Engineering change process, and engineering proposals in response to customer requests received during automotive project execution.
- Be able to communicate efficiently and clearly with internal suppliers and customers.
- Any other reasonable duties as required.

Your skills:

- Experienced with automotive requirements engineering tools (e.g. codebeamer, etc.)
- More of a "practical" than "theoretical" mindset
- Experience in an agile software development environment
- Knowledge of ASPICE, ISO26262 and ISO 21434 is a plus
- Hands-On mentality and strong problem-solving skills
- Experience and ability to work on a team
- Strong written and verbal communication skills

Your qualification:

- University degree with Engineering context preferably Computer Science or similar
- 2+ years of experience in an automotive software development environment

Our offer:

- Exciting challenges with room for new and innovative ideas within a highly qualified team
- High responsibility and steep learning curves on challenging automotive industry projects
- Flexible working hours
- A modern office environment in a central position of Vienna as well as professional remote work options
- A market compliant salary – minimum € 42.000 p.a. - in according to your qualification and experience
